CARDANO   TRON   bitcoin

Welcome to Crypto Corner!

We aim at bringing a value-added benefit of education, tools, ideas, community, opinions and information to our members to help them with everything crypto. Tokens to NFT's and everything in between. Organizing all web3.0 tools available and organizing them for our public toolbox. One of our goals and main use for our token will be a blockchain publishing platform and education/NFT marketplace. Our new publishing's will be able to be viewed if you own a certain amount of token (like a subscription except you get to hold) or one of our NFT's.

What is a Public Toolbox?

Basically an easy to use website with an organized set of links related to web3.0 tools and information we find relevant to assist in some way with blockchain. This is a free organized set of links for everyone forever. We plan on building an easy to access toolbox for everyone to start being able to actually use crypto instead of just holding it. By holding tokens and NFT's you will have access to premium toolbox features through our web3.0 verification system. We will add more and more blockchains over time. Here is an example of what we plan on gathering and organizing for each blockchain:

General Information
- o Blockscan Explorer
- o Stablecoins
- o Tax Applications
- o Blockchain Main Website and Basic Info

Wallets
- o Hot Storage
- o Cold Storage

NFT's
- o Marketplaces
- o Create NFT
- o Community Management
- o Fractional NFT's
- o Staking
- o NFT to Earn
- o Launchpads
- o Lending
- o Escrow Services
- o Discover, Research and Analysis

Token and Token Services
- o Token Locker Services
- o Create Token
- o Community Management
- o Marketing Token Services
- o Launchpads
- o Escrow Services
- o Discover, Research and Analysis

Defi
- o Farming
- o Pools
- o Collateralized Lending
- o P2P Lending

Exchanges
- o Centralized Exchanges
- o Decentralized Exchanges
- o Bridges
- o Automated Market Makers

Mining
- o Equipment Marketplaces
- o Mining Research and Information
- o Equipment Research and Guidance

- Cloud Based Mining
- Mining Software Providers

Analytics and Research
- DAPP Explorers
- Crosschain Analytics
- Social Analytics
- General Education Resources
- Trading Tools

Notable Projects and Social Following Recommendations
- Tokens
- NFT's
- Metaverse
- Defi

Metaverse
- Marketplaces
- Metaverse Education Materials
- Building Tools

Developer Assistance
- Rust
- Nodes
- Github

+++MORE IN THE FUTURE AS WE BUILD THIS TOGETHER +++

FOR HOLDERS: Blockchain Publishing with Protected Content + Education Marketplace

Content is paid for in token to the author and then available to holders of the token or NFT. You will only have access to this area if you hold a certain amount of token or one of our NFT's. Think of it like a blockchain newspaper and holding is the subscription fee. Other benefits including discounts on marketplace and other IRL benefits offered. Stay tune as we roll out products, we will give notice on their respective benefits and how they connect with what we are already doing.

As a function of our publishing content. Holders will be able to "tip" publishers articles/content increasing a content producers ability to receive more token. This will be implemented once our protected publishing views are created. Stay tuned here.

What is the Education Marketplace

Only holders of NFT or tokens have access to marketplace. Using tokens, holders can purchase education classes, guides, live workshops, and other digital education format we may offer.

Which blockchain are you using?

1. We will be using BNB for our initial token release. Binance Smart Chain has some of the best tools to release a token to achieve our goals.

2. We will be using Solana to issue our NFT's and eventually a new Solana token to pair with our existing BNB token. Our goal is to provide staking and also access to Protected Content and the Education Marketplace along with all other utilities provided including tipping content.

3. Other blockchains are being considered for additional NFT's or tokens such as Ethereum, NEAR, and TRX but further integration with these chains and into others will be for future discussions and implementations.

Will toolbox be in multiple languages?

Longer term vision ensures that all our materials and tools are in multiple languages. Initially everything will be in English. We will look for more and more community members to assist. Please reach out to us if you have interest in helping us!

Will our Binance Smart Chain token have tokenomics? - Yes

Crytpo Corner Token - $CCT Tokenomics - Reflection + Automatic LP + Marketing/Development

You don't have to farm or stake to get more tokens!

The reward amount is conditional upon the volume of the token being traded. This mechanism aims to alleviate some of the downward sell pressure put on the token caused by earlier adopters selling their tokens after farming crazy high APY's. Second, the reflect mechanism encourages holders to hang onto their tokens to garner higher kick-backs which are based upon a percentages carried out and dependent upon the total tokens held by the owner.

Marketing and Development Wallet

Our goal with this is to keep the community going over a long period of time and develop tools and information for the community to use. Our other goal is to have mutual incentive for content providers and content viewers ensuring that both are in line with our growth goals. We want this to last beyond ourselves and this accomplishes the dual ability to also provide development based on our community needs.

Automatic Liquidity Pool (LP)

$CCT implements automatic Liquidity Pool with Pancakeswap.finance, which acts as a dual benefit for holders. First, the contract takes tokens from sellers and buyers alike, and adds them to the LP creating a solid price floor. Second, the penalty acts as an arbitrage resistant mechanism that secures the volume of $CCT as a reward for the holders. Basically every trade adds a little liquidity to the underlying marketplace.

$CCT Tokenomics

$CCT employs 3 transactional functions:

Reflection + Automatic LP + Marketing, Dev & Community Content Fund

Transaction Breakdown

Reflection to Token Holders

2% Automatic Liquidity Pool Added
<u>Upon trading, set 6% "Slippage" set in the gear icon on pancakeswap trade view.</u>

What is the token initial token supply allocations?

<u>Total Supply: 1,000,000,000,000</u>
Burned Tokens: 350,000,000,000
Initial Liquidity Launch: 250,000,000,000
Community Content Pool: 300,000,000,000
Marketing Wallet: 50,000,000,000
Development Wallet: 50,000,000,000

Token Supply

Development, 5.00%

Liquidity in Pancakeswap, 25.00%

Community Content Pool, 30.00%

Marketing, 5.00%

Initial Burn, 35.00%

Is there a pre-sale? IDO? How do we purchase the token?

No presale, no IDO, and you will be able to purchase the token as soon as we add 5 BNB to the initial liquidity pool on www.pancakeswap.finance At that time we will fair launch and it will be tradable. We plan on launching in Q2 of 2022. Follow us for more details and to stay up to date on announcements. We will announce the fair launch 2 weeks prior to setting our liquidity pool up!

Set Slippage to 6%– For Tokenomics

What about NFT's?

We plan to release multiple sets of NFT's that have multiple utilities along with in-depth details about royalties and other usage for the project. We will have more details on these after the launch of our token and website. We will likely release NFT's on Solana then look into releasing into ETH, NEAR and then eventually Binance Smart Chain. Our NFT's will provide special access and staking capabilities along with other usage we will announce in the future.

Community Wallet

One goal of ours is to build a community wallet of NFT assets from PFP's, utility providers, collectibles and metaverses. If an asset is seen to assist in our community we plan on stocking up! We will share community wallet info once we have released it. Portions of asset sales will always go into the community wallet fund for these purchases.

Any other plans?

Yes and we are sure there are more to come…

1. Create a custom merch store for all the crypto we as our community have passion about. Using art contests and other design efforts, we plan on rolling out merch for in house and other crypto with community custom designs.

2. Multiple NFT projects on multiple blockchains. Include staking and publishing/marketplace access.

3. Review projects that want to be on our site, paid by developers with our token.

4. Discord Maturity including NFT verification, private alpha chat rooms, and additional way to connect with members.

5. Soon as we are large enough, we would apply to be on a CEX. We also are considering launching our token on multiple chains and create bridges to each ones we use so tokens can become interchangeable and usable across whichever chain we see the best fit for what we need to accomplish.

6. Applications for Coingecko and Coinmarketcap would be sent upon fair launch.

7. Attend IRL Conferences and IRL Education Events

8. Host our own Education Conferences and Events in Metaverse and IRL

9. Form a good group of writers for content production and ensure there are enough writers for a constant flow of relevant data and updates to our community/tools.

10. Creating and continue forming an underwriting guidelines for new tools to come onto the system and how we share our education to our members. Growing with the industry as we continue to change.

11. More to come…

We welcome you to Web3.0, Cryptocurrency and Blockchain…if you are new, this is for you.

If you have been in crypto for a while, please bring your insights, they are invaluable and this is for you too!

Let's enter into the new economy together.
